

Alexandar Valov

FRONT-END DEVELOPER

Hello.

Front-End Developer with close to three years of experience, most of it leading a team building **medical portals** for patients, doctors, clinics and laboratories. What I care about is whether the thing still makes sense six months and three developers later.

ABOUT

I got into web development the way most people do, messing around and building things. What kept me going was realizing how much the front end actually matters. **Not just visually, but architecturally.**

How you structure components, how a team scales a codebase, how a doctor using a medical portal at 2am needs things to just work: **that's what interests me more than chasing the latest framework.**

I care a lot about the details, the kind users don't notice when they're right, but feel **immediately when they're wrong.**

HARD SKILLS

Languages: TypeScript / JavaScript / HTML / CSS

Frameworks & Styling: Vue / Nuxt / React / Next.js / SCSS / Tailwind / Vuetify

Practices: Responsive design / Accessibility (WCAG) / SEO / Component-driven / Unit & E2E testing

DevOps & Tools: Docker / nginx / CI/CD / Git / Figma / Jira

SOFT SKILLS

Team Communication - Ran daily standups, manager updates and cross-team coordination as front-end lead.

Beyond Front-End - Owned the Docker + nginx release pipeline and acted as product owner when the platforms needed it.

Code Review - Reviewed teammates' PRs; comfortable being the person others check their work with before merging.

EXPERIENCE

Lead Front-End Developer

SKYWARE Group - Full-time

Nov 2024 - Aug 2026 - 1 yr 10 mos

Sofia, Sofia City, Bulgaria - Remote

- Led a cross-functional team building a suite of interconnected medical platforms for patients, doctors, clinics and laboratory staff.
- Architected and built the complete UI/UX of multiple platforms from scratch, following Material Design conventions.
- Owned the full release pipeline and acted as product owner, bridging the development team and stakeholders.

Front-End Developer

buglab - Full-time

Dec 2023 - Sep 2024 - 10 mos

Sofia, Sofia City, Bulgaria - Remote

- Built a custom design system from scratch, modernizing the platform's UI across the entire codebase.
- Owned all UI/UX decisions from initial Figma wireframes through to production, maintaining a documented component library with design tokens and variants.
- Built end-to-end user onboarding workflows requiring deep understanding of the platform's architecture and product logic.

EDUCATION

University of Plovdiv “Paisii Hilendarski”

Bachelor’s degree, Computer Software Engineering

Jul 2023 - Jul 2027

Cambridge Advanced Certificate in English (CAE)

Jul 2023 - Jul 2027
